EXPERIENCE

Airtel Digital

Assistant Manager, DDoS Analyst July 2025 to Present, Pune, India

SQL Data Extraction And Manipulation

- Executed complex SQL queries to extract, aggregate, and process large-scale traffic datasets and alert logs.

Data Validation and Preparation

- Cleaned and transformed datasets using Python (Pandas).
- Used Power BI for dashboard creation.

Automation and Efficiency Improvement

- Built Python scripts to automate data workflows, boosting efficiency and accuracy.

INTERNSHIP

Airtel Digital

Analyst Industry Internship Jan 2025 to Jun 2025, Pune

Coincent with Microsoft Association

AI and Data Science Internship Nov 2022 to Jan 2023, Remote

- Built a Fashion MNIST neural network achieving 90% accuracy, reducing misclassification by 18%.

PROJECTS

AGENTIC AI PROJECT-1 (LANGGRAPH) : Interactive AI Personal Co-Worker with Tool-Integrated Multi-Agent system

- Created a smart assistant using LangChain and ChatOpenAI that follows steps using a graph system.
- Added useful tools like **Playwright browser automation**, **file management**, **Pushover notifications**, **GoogleSerper API search**, **Wikipedia queries**, and a **Python REPL**.
- Built a evaluator agent that checks if tasks are done correctly and asks for help if needed.

AGENTIC AI PROJECT-2 (OPENAI AGENTIC SDK): Autonomous Multi-Agent report generation and email sender System using

- Built an AI-powered multi-agent research system using the OpenAI Agentic SDK, integrating planner, web search, writer, and email agents for automated research and report generation.
- Utilized tools like **WebSearchTool** for dynamic information retrieval and a custom **email sender tool** for automated delivery of HTML-formatted reports.

LANGCHAIN PROJECTS

- RAG-based Research Assistant: Developed a document and URL QA system using Langchain, FAISS, and custom LLMs. Enabled real-time question answering from PDFs, DOCX, and web pages with efficient chunking, embedding (sentence-transformers), and multi-format loaders.
- AI-Powered Vulnerability Scanner And Auto-Fix Tool: A system to detect and automatically fix code vulnerabilities using LangChain.

Prediction Models

- Built models using algorithms like Decision Tree, Naive Bayes, SVM, and Random Forest.

SUMMARY

AI and Data Science Engineer specializing in LLM-integrated automation, multi-agent systems using LANGGRAPH and OPENAI AGENTIC SDK, and data-driven analytics. Proficient in anomaly detection, and end-to-end AI workflows using Python and LangChains. Skilled in SQL-based data extraction, model development, and dashboard creation with Power BI.

SKILLS

Programming & Tools

- Python

Data Analytics & Visualization

- Power BI, Tableau, Pandas, NumPy, Data Cleaning, Trend Analysis

Machine Learning & AI

- Scikit-Learn, Decision Tree, SVM, Random Forest, Logistic Regression

Generative AI And Agentic AI

- LangGraph, OPENAI AGENTIC SDK, LangChain(RAGs)

Database Management

- MySQL

Soft Skills

- Analytical Thinking, Problem Solving, Adaptability, Communication

EDUCATION

B.Tech - Artificial Intelligence & Data Science

- Vishwakarma Institute of Technology (Pune, India)
- CGPA: 8.52 , Passing Year: JUNE 2025

Class XII (CBSE)

- The Orbis School (Pune, India)
- Percentage: 90.2, Passing Year: MARCH 2021

Class X (CBSE)

- Mother Marys School (Delhi,India)
- Percentage: 96, Passing Year: MARCH 2019

EXTRA-CURRICULAR AND LEADERSHIP

- Video Editing, Arts, Sports, Gaming
- Aesthetic Co-ordinator (EPEC, Vishwakarma Institute of Technology)
